1. Visit the AnyDesk website using Google Chrome (or your preferred browser) and click on the **Downloads** tab.

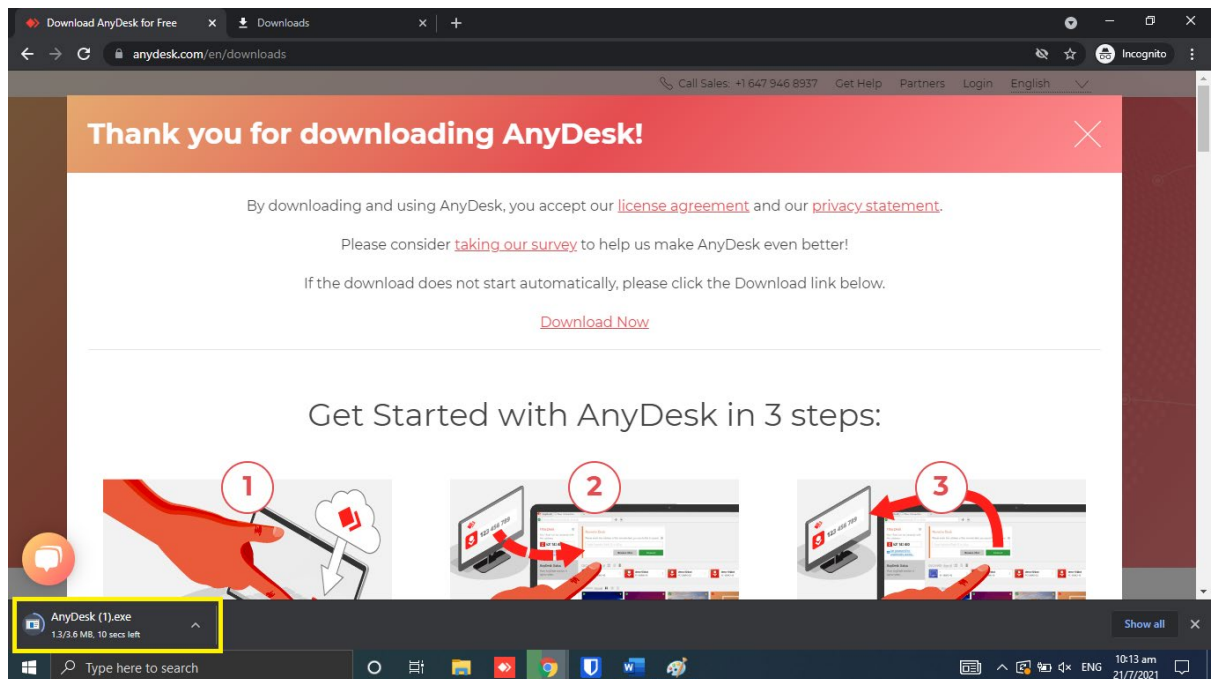

2. On the Downloads page, ensure that the ① Windows version is selected, then click on the ② **Download Now** button in the middle. A dropdown menu will appear; click on ③ **Download Version 6.**
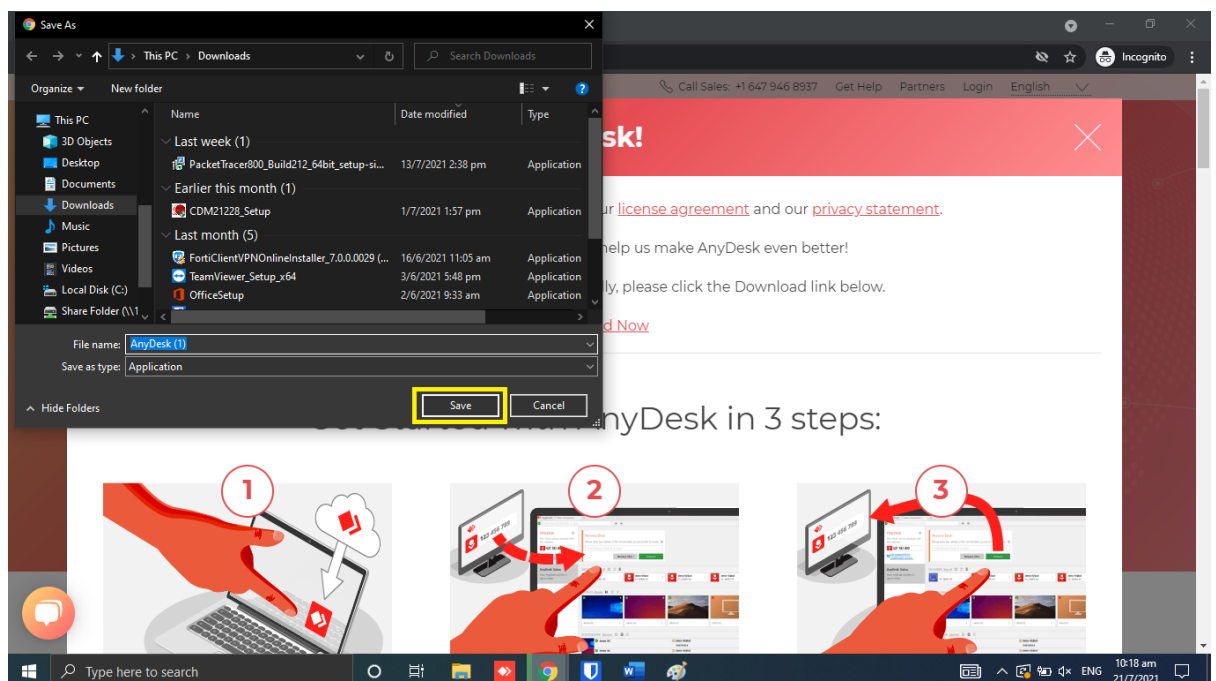

3. A download bar will appear at the bottom, showing you have started the download. You can press left-click on it so that it will run after downloading.

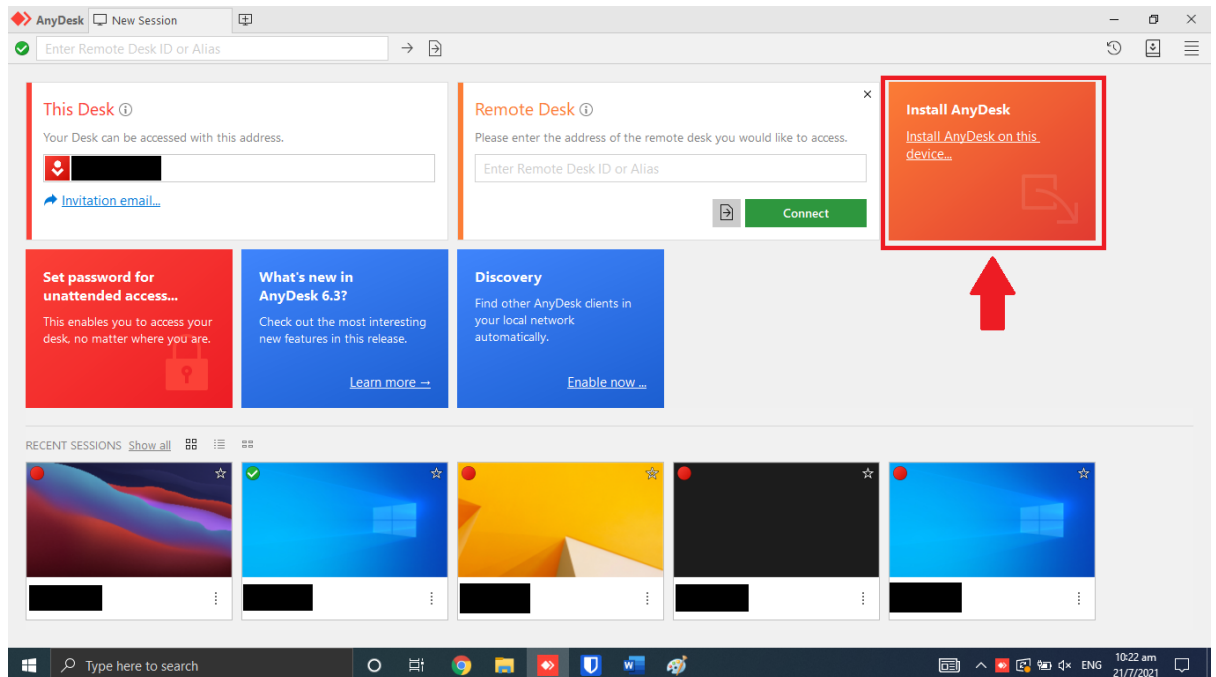

For some users, another window may pop up asking where to save the file. Click on the Save button then follow the steps above.
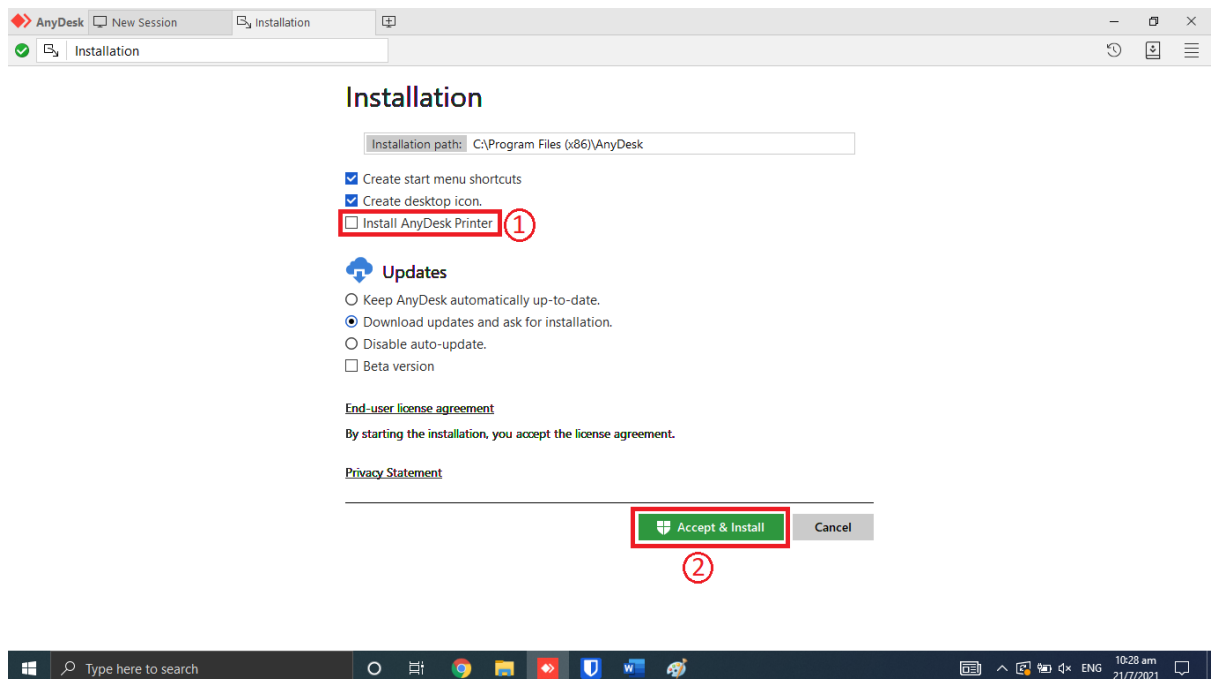

4. AnyDesk will appear once the download is complete. Locate the **Install AnyDesk** note on the program and **left-click** to initiate the installation.

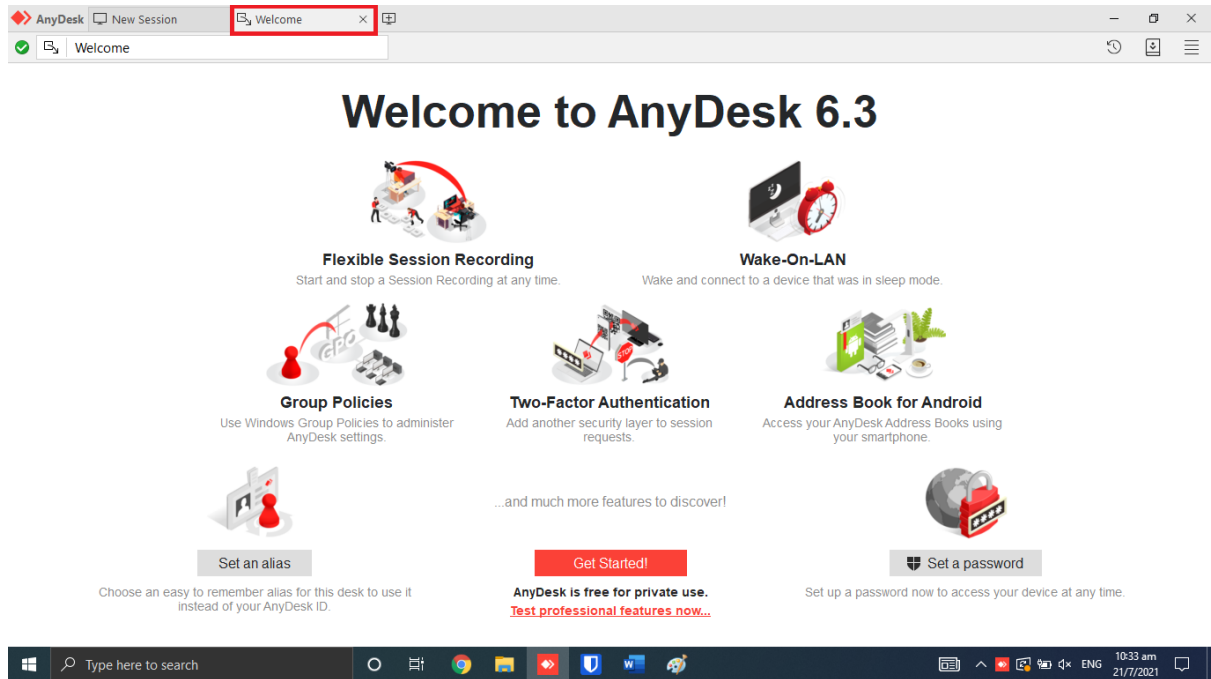

5. The Installation tab will appear. ① **Untick** the option to **Install AnyDesk Printer** and click on the ② **Accept & Install** button.

6. A request for permission to make changes on your device will appear for AnyDesk. Click on **Yes.**

7. Once the installation is complete, the Installation tab will change to a Welcome tab. You can click on the X button to close it.

*Quick rundown: If the installation is successful, the Install AnyDesk note will be missing now. Under the This Desk note, there will be a **9 digit number**. This will be the ID you have to provide to the IT helpdesk when requested.*
